Generic versions of ZURZUVAE are not available.

[a]The WAC is the manufacturer's undiscounted list price for a pharmaceutical product when it is sold to wholesalers, distributors, or other direct purchasers. The WAC does not represent an actual transaction price and does not include discounts, rebates, or other reductions in price.
[b]All costs are based on package size and assume 100% compliance and 100% efficient use of drug.

Out-of-pocket costs for an insured patient are likely lower than WAC depending on their insurance benefits.[2]
